

AHMED SAIDANI

Software Engineer

EDUCATION

Bachelor's degree :

Computer Science
2021-2025

Master's degree :

Software Engineering and Web
Technologies
2025-Now

SKILLS

Programming languages :

c/c++ , java , javascript ,
typescript , python

Web Technologies: HTML , CSS ,
springboot , php

Frameworks : Angular, React,
Node, NestJs, React
Native, Symfony

Databases : MongoDB ,
Cassandra , SQL

Devops: AWS, Kafka, Git, Docker,
Kubernetes, Jenkins, Shell,
Terraform

ui/ux design : Figma , Adobe
photoshop

EXPERIENCE

Web Developer

7/2022-1/2023

Worked within a team at Orange Developer System (OCD) to design and build Orange Bridge, a web-based interview platform enabling employers to assess candidates' coding, communication, and problem-solving skills. Contributed to features like customizable assessments, real-time evaluations, and performance tracking, helping streamline and enhance the recruitment process.

Tech Used : Angular , NodeJs

Cloud Reporting & Automation Engineer

8/2023 - 1/2024

Next-Step | Chargia - Tunisia

Enabled faster decision-making by developing an automated dashboard that centralized data from cloud services (backup, messaging, IaaS). Automated API-driven reporting eliminated manual work, increased accuracy, and delivered real-time insights on storage, VMs, and resource consumption

Tech Used : React , Node

Mobile Application Development

1/2024-10/2024

Delivered high-quality cross-platform mobile applications with React Native, providing seamless performance on iOS and Android. Improved user engagement through responsive, intuitive interfaces and optimized app performance, while ensuring client requirements were met with scalable, reliable solutions.

Tech Used : React Native , Node

Freelance Web Developer

3/2022-Now

Built and delivered 30+ custom websites and web applications for 20+ clients — from e-commerce platforms to booking systems — helping businesses like jewelry brands, fashion boutiques, and car rental agencies strengthen their online presence. Ensured modern, responsive designs and optimized performance to drive customer engagement and meet client goals.

Tech Used : React , Node

DevOps Solutions Engineer

3/2025-7/2025

Implemented DevOps practices that streamlined development and deployment pipelines, reducing release times and improving system reliability. Automated infrastructure provisioning, monitoring, and CI/CD workflows, which minimized manual effort and increased deployment consistency. Enhanced collaboration between development and operations teams, ensuring faster delivery of high-quality, scalable applications

Tech Used : Docker , Jenkins
